

Uncover Hidden Opportunities

with a FlexTech Consultant

NYSERDA-Approved FlexTech Consultant

NYSERDA

Energy can be a significant part of the cost to run your business, but these costs can be managed if you work with a FlexTech Consultant to identify opportunities to reduce energy use.

Gain Confidence

Consultants provide objective, site-specific, and targeted studies and will work with you to determine the best approach based on your needs, so you can feel confident in the decisions you're making.

Eligible study areas can include:

- Energy master planning
- Energy studies such as ASHRAE Level II or comparable analyses
- Targeted system or equipment upgrade evaluations
- Clean heating and cooling systems
- Energy efficiency retrocommissioning
- Strategic energy management assistance
- Distributed energy resources including combined heat and power (CHP) and energy storage feasibility studies

By working with a FlexTech Consultant, you can reduce your upfront capital commitment, and receive objective recommendations from experienced consultants.

Through the FlexTech Program you can learn:

- If a clean energy project is right for you
- How to reduce your energy bills
- The payback on potential energy-related building upgrades
- How to develop a capital plan that includes clean energy components

TOTAL ENERGY COSTS
From our experience, we can recommend energy measures that will significantly reduce energy and operational costs.

Building Envelope

Cooling

Control & Building Automation

Ventilation & Indoor Air Quality

Lighting: Indoor & Outdoor

Heating

Proven Results

Wendel completed a FlexTech Study for St. Lawrence County that recommended 25 energy efficiency measures at 8 County owned facilities. The \$2.8M project is saving the County over \$3.5M in energy and operational costs over the equipments' useful life. In addition, the County is benefitting from facility upgrades that improve system reliability, occupant comfort and assist with meeting sustainability goals.

Cost-Saving Strategies

Through the NYSERDA FlexTech program, Wendel will perform indepth evaluation and analyses that can lead to significant savings.

In the end, you will receive a report, including a financial summary, allowing you to make an informed decision.

Wendel is a professional energy services company that provides NYSERDA FlexTech Programming services, since 1994. We have completed over 400 FlexTech Studies for State agency, local government, K-12 and higher education, commercial and industrial facility owners. We offer a broad range of energy systems expertise that can identify and evaluate opportunities that have a proven ability to provide significant energy and operational savings.

Wendel is a qualified Energy Service Company by the US Department of Energy, and an accredited Energy Service Company by the National Association of Energy Service Companies (NAESCO).
